(54) OPTICAL DIODE

(57)Abstract:

PURPOSE: To effectively use a light emitted to the useless direction from a light-emitting element in a light-emitting diode in which a part of the light-emitting element is packaged in a mold part made of transparent plastics having a lens.

CONSTITUTION: In a part on the outer peripheral surface in a mold part 6 having a lens 17 which packages a light-emitting element 14, a level plane 18 parallel to an axis line of the mold part 16 is formed extending to the lens 17 in the mold part 16.

LEGAL STATUS

[Date of request for examination] 09.04.1998

[Date of sending the examiner's decision of rejection] 31.10.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
